

Ensuring the Safety and Security of our Communities

June 20, 2022 - Toronto, ON - This weekend we were made aware of an allegation against an employee that attempted to engage a minor online. We take the safety and security of our communities and our customers very seriously and took immediate action to suspend the employee. We immediately contacted and shared the matter with the Edmonton Police Service and we are fully cooperating with the investigation.

We have zero tolerance for this type of behaviour by any employee and this directly contradicts our company standards and core values. We believe in a safe retail environment where our customers are valued and respected.

For any media enquiries contact:
